Setting your tent up

After selecting your ideal spot, it's time to get to work and set up your tent! Secure the poles into the ground, ensuring you choose the correct angle and apply the appropriate pressure. For guidance, you can consult the system's recommendations to ensure everything is done correctly.
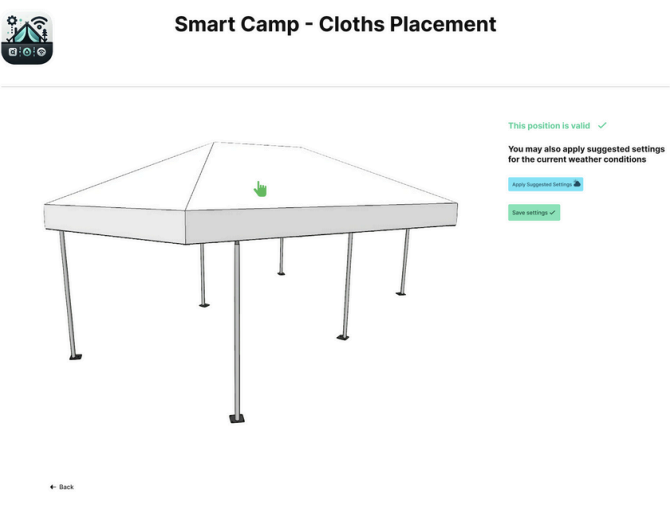

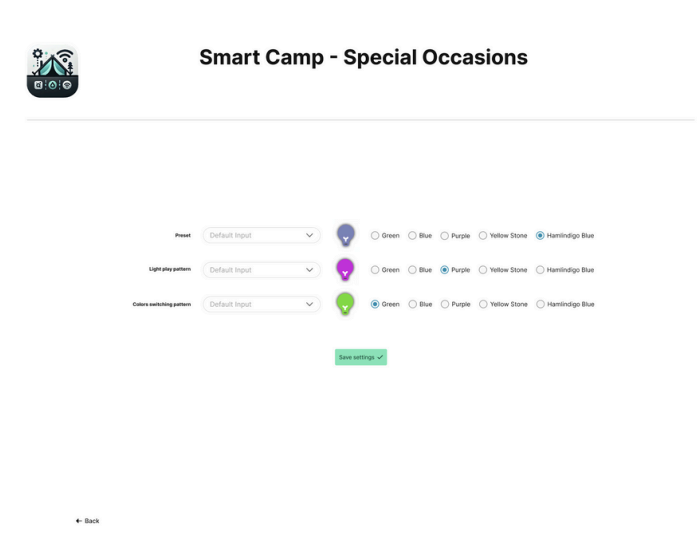

Placing the protective cloths

If the wind is picking up, it's time to add protective cloths around your tent! You can either position the cloths manually by dragging them to your preferred spots or simply apply the suggested settings by clicking the corresponding button.
